Built With:

This project was built using these technologies.

- React.js
- CSS3
- HTML5
- VsCode

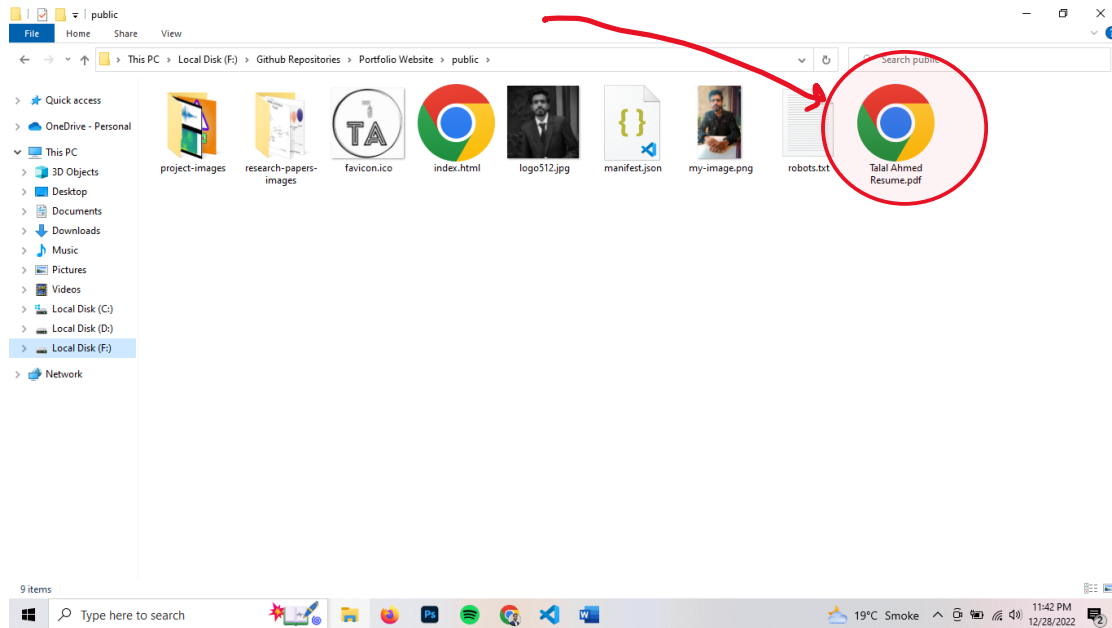

Deployment:

This project is deployed on [Vercel.com](https://vercel.com).

“Updating Changes in Website”

Updating Resume:

Go to the public folder in the project directory and delete the old resume file and add the new one. *The file name must be “Talal Ahmed Resume.pdf”.*

Add a New Project:

Go to the project directory then `\public\project-images`. Add the “project image” and then go to the `\src\components\projects\Projects.js`. You will find the commented code there, add links and heading according to requirements there. The code snippet is given below also.

Add the required information in the red-marked places.

```
<div className={classes['project-item']}>
  <a href={'Github Repository link'} target={'_blank'}>
    <img src='/project-images/add the image name with extension that you added' />
  </a>
  <div className={classes['project-description']}>
    <h1>project name</h1>
  </div>
</div>
```

Add a New Research Paper:

Go to the project directory then **public\research-papers-images**. Add the project image and then go to the **src\components\research papers\Research.js**. You will find the commented code there, add links and heading according to requirements there. The code snippet is given below also.

Add the required information in the red-marked places.

```
<div className={classes['project-item']}>
  <a href={'Github Repository link'}>
    <img src='/research-papers-images/' add the image name with extension that you added' />
  </a>
  <div className={classes['project-description']}>
    <h1>Research paper name</h1>
  </div>
</div>
```

Thank you for believing in me. Best of luck with your future endeavors :)
